2011 Winter League

Match No. 1

Date: **6th March 2010.**

Venue: **Staplehurst Reservoir, Kent.**

Conditions:

Still very damp, the car parking area was still pretty muddy, cloudy all day with that continuing cold NE wind that chilled one to the bone!, brollies were necessary on the East bank to stop from freezing! Water level of the reservoir was high & very clear, 3' visibility.

Summary:

With 13 of us a reasonable start to the 2011 winter series. Once again everyone struggled to catch in the cold conditions; a couple of small Carp made all the difference to the results, Colin M. in the SE corner was able to tempt a small bag of Roach as well that helped him win the match, hard work though. All other competitors concentrated on the Roach using the pole; the feeder did not prove so productive, red & white maggot caught, hardly anything on pellet. Steve in the other corner had problems with the underwater ropes that secured the pumps, this limited his methods, Tony on the North reed bank end also had similar problems with old floating vegetation but that's the luck of the draw, (the cut down trees & branches at that end have still not been removed) Not the best start to the year.
