### 2011 Summer League

#### Match No. 7

Date: **7<sup>th</sup> August 2011.**

Venue: **Staplehurst Reservoir, Kent.**

#### Conditions:

A cloudy day with sunny spells but with the odd heavy shower. Variable gusty winds that made it 'interesting'. Water level was well down with 18" visibility. It was 'claggy' on the bank after it had rained!

#### Summary:

A good field despite it being in the main holiday period. Carp was the main target; Ralf & Alan fought it out next to each other fish for fish with Alan just pipping him at the end of the day by a pound or so. The preferred method was feeder on pellet but 'waggler' 4' pellet method was successful. A number of fish were lost on the pole; the carp just go off like trains! A savage take nearly caught Tony unawares grabbing the rod just in time as it was taken off the rest! All his fish were taken on twin red maggots. The carp tend to move round this reservoir & it's a case of trying to attract & hold them.

Maggots tended to attract the smaller species like Roach, Rudd & Perch; corn, pellet, bread & worm were the more successful bait for the larger fish.
