Match No. 7

Date: 4th July 2009.

Venue: River Medway, Watlingbury, Kent. (Manor Farm Ponds conditions not suitable)

Conditions: A cloudy but warm start to the day, a bit damp under foot with the over night rain after the heat wave of the previous week. The day remained sunny, warm & hot with a breeze developing that made it a bit more comfortable. The water level was normal & clear 2' visibility.

Summary: Again a good turn out. Due to the number of competitors & the overgrown swims around the ponds it was deemed the venue not suitable, a vote was taken to hold the match on a reserve venue; the Medway was the best option. The start time was delayed by ½ hour. Most bags contained Roach, Bleak, Perch & Skimmers with a distinct lack of any Bream. All methods produced Pole, Wagglers & Feeder, red/bronze maggots & worm being the most productive bait. With the weights being low one good fish would have made all the difference. Tony lost a reasonable Bream at the landing net to a particularly persistent Pike that took it on the surface! Kevin in the second field had a bit of action with them having quite a number of takes resulting in two reasonable fish. Jim learnt a costly lesson by losing a good Bream due to a hastily tied knot! At times the river did end up looking like the M25 with all the river traffic (amazingly well behaved this time!) Unfortunately a lot of competitors only brought enough bait/ground bait & gear set ups for the Ponds so this did reflect in the catch results for some!
